Short Circuits Joins Forces with Sierra Midwest

First of all let me take this opportunity to thank you for your many years of business, and to let you know about some exciting changes that have occurred. After over 20 years of doing business here in Colorado, Short Circuits has joined forces with Sierra Midwest to offer you a greater range of high quality products and services.

Sierra Midwest is one of the industry leaders when it comes to PCB fabrication. Their factory located in Chanute, Kansas specializes in high-mix, prototype and low to medium volume quantities and they have long term relationships with off-shore partners that handle the higher volume price sensitive orders. They also have a sister company, Sierra Proto Express, located in Sunnyvale California. They specialize in 24 hour quick turns, Mil-Spec, High Technology, and Microelectronics. By using Sierra Midwest you will receive world class PCBs and service, you are also assured that you have a vendor that can handle all of your PCB needs both today and in the future. One of the keys to Sierra's phenomenal growth has been their focus on customer service, so with that being said, Sierra's Customer Service personnel located in Longmont Colorado will service your PCB needs moving forward. All Short Circuits phones and e-mails have been forwarded to this office.

With the permission of our valued customers, all future business will be fabricated by Sierra Midwest.

It is my hope that you will continue to do business with us now as Sierra Midwest and enjoy all of the benefits that working with a company like Sierra Midwest will provide. Please visit their web site for full company review. <http://www.sierramidwest.com>

Once again thank you for your business and your loyalty. We look forward to an even stronger and more efficient relationship in the future. Please do not hesitate to call me if you have any questions.

Sincerely
Paul Sloan
