Ms. Estrelita Manasan
Sierra Circuits, Inc.
1108 West Evelyn Ave
Sunnyvale, CA 94086

Dear Estrelita:

RE: Acceptable Capability Verification Inspection, MIL-PRF-31032, January 01, 2022 through December 31, 2023 Reporting Period; CAGE Code OZHS4; CN087389 VQE-24-038763

The information submitted for your biennial Capability Verification Inspection report has been reviewed. The data successfully demonstrates your ability to manufacture printed wiring boards to the currently qualified capabilities. Therefore, qualification is reissued under the current issue of the Department of Defense Performance Specification MIL-PRF-31032, Printed Circuit Board/Printed Wiring Board, and associated specification MIL-PRF-31032/1, /2, /3, /4 and your listings will be continued on the Qualified Manufacturers List QML. Reciprocal listings are also continued on Qualified Products Lists QPL-55110.

Your next CVI report should cover the period from January 1, 2024 through December 31, 2025, and is due to this office by March 02, 2026. These qualifications are based on your MIL-PRF-31032 certification and are subject to the conditions stated below:

- A listing on the Qualified Manufacturers List (QML) does not guarantee acceptance of the product(s) in any future purchase.
- QML listing does not constitute a waiver of any requirements of the specification or of the provisions of any contract.
- Advertising of qualification information is permitted. Permission to use such information for advertising or publicity purposes is granted provided that such publicity or advertising does not state or imply that the product(s) is the only product of that type qualified or that the Department of Defense in any way recommends or endorses the manufacturer's product.
- The listing applies only to products produced in the plant(s) specified in this letter and applies to future amendments or revisions of the specification, unless otherwise notified.
- The listing applies only to materials and manufacturing construction techniques identical to or covered by that (those) qualified. The qualifying activity must be advised in advance of any change to the materials and manufacturing construction techniques. Failure to notify the qualifying activity of any change to the materials and manufacturing construction techniques is cause for removal from the QML.

Because we are held responsible for the accuracy and currency of this QML, please let us know if your company discontinues production utilizing these materials or processes. If you have any questions, please contact Mr. Joel Metzker, (614) 692-5063.

Sincerely,
